

CoSER TRANSITION SERVICES AVAILABLE TO DISTRICTS

The Arc, Oneida-Lewis Chapter provides transition programs and services for students with disabilities to improve outcomes after high school. Services include training in work/life skills, independent living skills, job shadowing, internships, career exploration, job retention skill training and the college experience. The half-day programs are contingent upon enrollment of at least six students. These services are for students in grades 7-12, whose expected outcome is community based employment, and any disability is accepted. Students are bused by their home school district to programs in the community. The Arc provides van transportation from program site to community visits. These services can be beneficially provided in a continuum.
